Change Management

Navigate the complexity, coordination, and execution of the change process lifecycle to drive continuous improvement

**MANAGE AND DEPLOY CHANGES EFFECTIVELY AND CONSISTENTLY WITH COLLABORATIVE
STAKEHOLDER INVOLVEMENT**

Change is everywhere throughout every organization. In CQ, Change Requests can be initiated from anywhere in your organization. CQ Change Management follows best practice workflows to successfully implement changes from initiation and review/approval to execution tracking, verification and closure. You can even include your supply chain partners in the process!

The backbone of any effective quality system, CQ's Change Management automatically connects with other QMS workflows including CAPA, Document Management and Training Management to ensure seamless integration between QMS processes for better adoption and audit readiness. It not only ensures compliance by maintaining detailed documentation on all changes, such as those related to design specifications, SOPs, materials, suppliers, and processes--but a good change process can also greatly enhance your company's productivity and customer satisfaction.

Support Your Entire Organization

Management

Understand impact, status, and effectivity of change through real-time dashboards to eliminate uncertainty for the company.

Change Manager/ Coordinator

To minimize risk and impact to the business, assure changes are properly assessed, reviewed, and deployed.

Quality

Streamline visibility, tracking and compliance for changes in process, product, people, and equipment.

Manufacturing

Reduce scrap and waste with real-time notification and information of changes and change activities involving key manufacturing individuals.

Engineering

Gain confidence that engineering change orders will propagate to the right people, at the right time.

Supply Chain

Remove bottlenecks and clearly communicate changes in real-time to/from suppliers to prevent supply chain disruption.

Key CQ Change Management Software System Features

Change Verification & Closure

With close-loop change management, automatically assign tasks to evaluate the outcome of the change on affected products or processes.

Change Control

Using Change Control, streamline the process and guarantee consistency and repeatability across the entire change process. Accelerate the change management process for improved productivity and reduced cost of change.

Mobile Access

Review, escalate and approve changes anywhere, at any time, on your own device.

Reporting & Analytics

Understand trends in changes, identify patterns, monitor open change initiatives via dashboards, track outcomes around specific products, track deviations per product and report on open/closed changes. Use built-in best practice based reports or create your own.

Social Engagement

Anyone can follow change record processes. Share information easily via Salesforce.com-based enterprise collaboration software (Chatter).

Change Initiation

Initiate a change with detailed information such as area of change, scope of change, reason for change, type of change (i.e. normal or emergency), proposed change dates, associated risks, expected impact, and any relevant non-conformance or CAPA that may have prompted the change.

Change Evaluation

Easily route changes to the right team (e.g., Quality, Engineering) for evaluation, review/assessment and approval.

Change Execution & Tracking

Document-required tasks to be executed and tracked, each for completion by assigned due dates.

Achieve Your Quest for Digital Operations

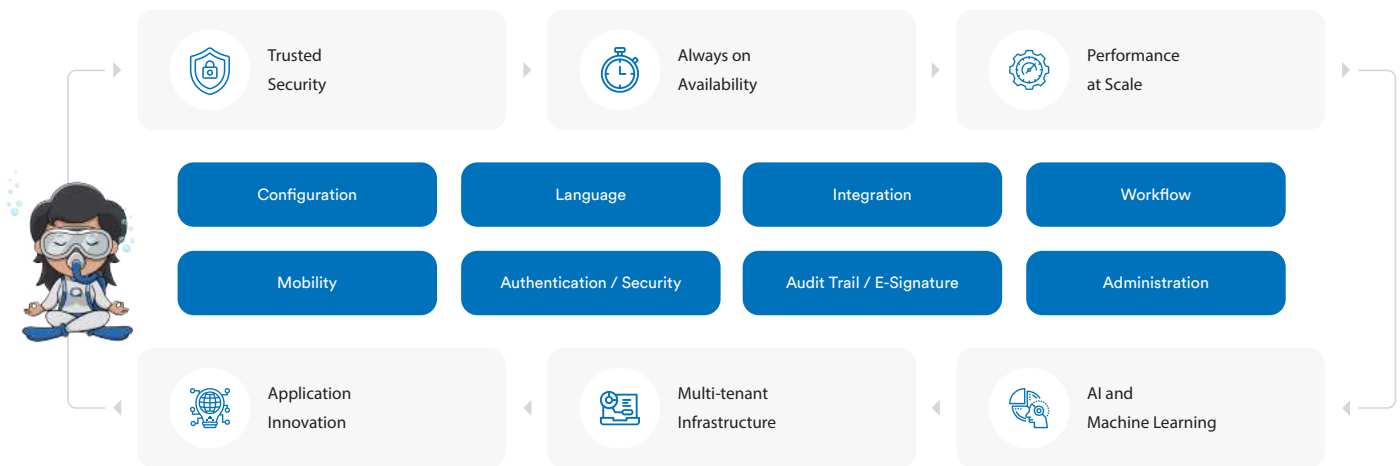

CQ intelligently automates operations from product innovation to customer success

CQ Solutions Powered by Platform

100% modern cloud infrastructure supports innovation

ComplianceQuest is a 100% native force.com application suite. As such, ComplianceQuest solutions inherit all attributes of the Salesforce platform.

About ComplianceQuest

Transform to a fully connected business with a **next-generation AI-Powered Product Lifecycle, Quality and Safety management platform, built on Salesforce**. Our connected suite of solutions helps businesses of all sizes increase quality, safety and efficiency as they bring their products from concept to customer success. Our intelligent data-driven platform comes with best-in-class integrated processes to mitigate risks, protecting your employees, suppliers and brand reputation, and to increase innovation, compliance, profit and customer loyalty. ComplianceQuest is pre-validated and easy to implement, use, and maintain, allowing for streamlined communication and collaboration across the product value chain.
